

## Combustion Services - Calibrations

ETTER Engineering's Pyrometry Services bring NIST traceable consistency to your facilities by having one company standardize your Pyrometry. All instruments used are calibrated to AMS 2750E.

Do you have problems with your documentation? Issues such as:

- Overshoots
- Tolerance
- Lag time
- Stabilization
- Calibration Interpolation
- Thermocouple Location
- Correction factors
- Dimensions
- Range of Use
- Off sets
- Keeping track of due dates
- Auditors
- Keeping track of which furnace is certified for what

An ETTER Engineering Pyrometry Service will ensure your Calibrations are up-to-date, correction factors are proper, and pictures are accurate for dimensions and thermocouple locations. We will document whether furnaces are monthly, bi-monthly, quarterly, semi-annual or annual, while ensuring dimensions and range of use are accurate. Correct notes are documented, and certifications or off-sets, and other criteria for specific furnaces are noted.

### For Heat Treaters, we offer:

- Presence during NADCAP & AMS 2750E Audits
- Certification reports delivered on-site
- Training Seminars on Pyrometry
- Experience with all types of furnaces, from car bottoms to vacuum

Our report guarantees speed, accuracy, easy to read reports, with due dates clearly stated.

ETTER Engineering also offers Temperature Uniformity Surveys for a wide variety of processes and applications, in addition to clear, concise and consistent Instrument Calibration with:

- Same Day Turnaround
- In-depth Reports
- NIST, AMS 2750E

With thorough knowledge of specifications, our System Accuracy Tests provide:

- Scheduled Reminders
- Nationwide Service
